## PROFILE INFO

As a *MERN* stack developer intern, I have developed skills in front-end and back-end development, testing methodologies, and Agile development. I have contributed to developing robust and user-friendly web applications, collaborated with team members to identify and resolve issues, and utilized tools such as JIRA and Git. I am eager to continue my career in MERN stack development and contribute to the growth of the company.

## EXPERIENCE

### Full Stack Developer Intern

January 2023- Current, (Remote)

#### Bit Brothers

- Developed and maintained a POS system , Implemented inventory management, sales tracking, and reporting features in the system.
- Developed and executed integration testing plans for web applications using tools like Postman and JEST testing library.

### Full Stack Developer Intern

October 2022-December 2022 (Remote)

#### FlameCloud

- Implemented features such as product search, product listing, cart management, and order tracking, both on the server and user end providing a seamless shopping experience for customers.

## PROJECTS

### Nykaa Clone(E-Commerce)

**Tech Stack:-** MERN Stack

- Developed and maintained front-end components using React.js and Redux to create a seamless user interface.
- Developed and maintained a database using MongoDB, ensuring data integrity and security.
- Developed and maintained a back-end using Node.js and Express.js to handle API requests and perform server-side operations.
- Implemented features such as user authentication, error handling, and API versioning to ensure a secure and scalable back-end
- Deployed the front-end to Netlify and the back-end to Heroku, ensuring seamless and scalable deployment.
